Jarvis 2026 Annual Goals

To All Team Members

2026 is a transformative year for Jarvis.

We are not just a software company in Vietnam. Our goal is to become a pioneer in AGI applications—a lean team delivering capabilities beyond our size, aligned with world-leading technology.

This document represents our shared direction and commitment.

Company Vision

"Become a small but mighty R&D company in Vietnam, aligned with world-leading technical capabilities, pioneering AGI applications"

Core Philosophy & Values

We believe an excellent tech company must embrace the future while staying true to its people. Here are the eight core beliefs that drive Jarvis forward:

Technology-Driven

Philosophy	Description
AI Governance	Replace traditional management with AI-driven decision making
Lean Team	Small headcount, maximized capability
AI-Native Talent	Cultivate next-generation talent who can collaborate with AI
Full AI Integration	AI embedded in every aspect from development to management

People-First

Value	Description
Transparent Communication	Direct, honest, and transparent information flow
Collaboration	Mutual support and strong teamwork
Win-Win & Sharing	Fair sharing of results and co-creation of value
Family	We are not just colleagues; we are a Family

2026 Core Objectives

1. Financial Goals

Our target: Build the foundation for break-even by 2027 Q2

Item	Target
Annual Revenue Target	50-60 billion VND (~\$200-250K USD)
Baseline Comparison	~2x of 2025 total costs
Break-even	2027 Q2

Revenue Sources

Source	Description	Estimated Revenue
Siraya Service Fee	Existing partnership, salary + service fee	Ongoing
Anti-Hijacking Commission	Target 50 customers, per contract terms	Per contract
Product Maintenance Fee	Fixed monthly fee	Fixed monthly
TOMO AI HR Project	Localization development fee	Thousands USD
Sky-Net GC Project	Third-party game integration, 100+ games	Tens of thousands USD

2. Organization Goals

Build a lean yet powerful R&D team

Item	Current	2026 Target
Team Size	~8 people	15 people
Team Composition	-	Development + PM + Admin
Key Hire	-	Technical Lead (Q1)

Technical Lead — The Talent We Seek

We need not just a manager, but a leader with an entrepreneurial mindset:

- Hands-on Expertise: Deep technical foundation, able to solve problems directly
- Leadership & Integration: Excellent leadership, able to integrate cross-departmental resources
- Forward Thinking: Insight into future trends, leading the team to breakthroughs

Organization Structure & Reporting

Tech Lead reports directly to Ryan, accountable to "clients".

Expansion Plan

Quarter	New Hires	Total	Focus
Q1	+3	11	Technical Lead + Developers
Q2	+2	13	Developers
Q3	+1	14	Developers
Q4	+1	15	Developers

3. Product Goals

Existing Projects (Ongoing until Year-End)

Product	Client	2026 Target
Customer Portal System	Siraya	Continuous development and maintenance, feature optimization, year-round service
Anti-Hijacking Product	Siraya	Continuous optimization, new features, revenue generation, year-round maintenance

These two projects are Jarvis's core business, continuing development and maintenance through the end of 2026, ensuring Siraya's service quality and product competitiveness.

New Projects

Product	2026 Target
TOMO AI HR	Q2 localization, Q3 external sales

4. Technical Goals

Build a professional, efficient, AI-driven development team

4.1 Standardized Development Process (Q1)

- Git Flow and Code Review standards
- CI/CD automated deployment
- Documentation standards (API Doc, README)

4.2 Project Management System (Q1)

- Sprint Planning + Retrospective
- Time estimation and tracking
- Issue Tracking standardization

4.3 Vibe Coding Training (Q1 Start, Q2 Ongoing)

This is our key capability for embracing the AI era:

- AI-assisted development tools (Cursor / Copilot)
- Prompt Engineering fundamentals
- AI Code Review process
- Goal: Reduce repetitive coding, let engineers focus on creating value

4.4 Quality Control (Q2)

- Automated testing implementation
- Unit test coverage targets
- Pre-launch checklist

5. Internationalization Goals

Strengthen cross-border collaboration, integrate group resources, make Jarvis truly international

5.1 Cross-Border Project Collaboration

In 2026, we will initiate 3 new projects with 3 different group companies:

Project	Partner	Timeline	Content
#1 TOMO AI HR	TOMO	Q2 Start → Q3 Sales	Customization + Distribution + Integration
#2 Sky-Net GC	Sky-Net	Q3	Third-party game integration (100+ games)
#3 Team R&D	Jarvis	Q3	Self-developed product for Vietnam market

For the third project, we leave it to the team to decide. When we have complete development capabilities, I hope Jarvis can have its own flagship product—one built for the Vietnam market, unanimously agreed upon by the team, and fully committed to.

5.2 Cross-Border Communication Skills

- Target: PM, Technical Lead, Admin Lead
- Methods: AI translation tools + language training
- Goal: Independent communication with group companies
- Execution: Year-round (online)

5.3 Cross-Border Exchange Activities

In 2026, at least 3 cross-border in-person exchanges:

#	Timeline	Description
1st	End of Q1	Kickoff exchange
2nd	Q3	Project collaboration exchange
3rd	Before Q4 Year-end	Year-end Celebration Party ☐

2026 KPI Overview

Metric	Target	Timeline	Measurement
Annual Revenue	50-60 billion VND	Full Year	Financial Reports
Team Size	15 people	Q4	Year-end count
Technical Lead	1 person	Q1	Hiring records
Anti-Hijacking Customers	50	Q4	Siraya sales data
Development Process	Complete	Q1	Documentation
PM System	Complete	Q1	Documentation
Vibe Coding Training	Complete	Q2	Training records
Automated Testing	Complete	Q2	Test reports
Cross-Border Projects	3	Q3	Project records
Cross-Border Exchanges	3	Q4	Event records

Closing

In 2026, we will grow from a small team into a professional R&D company with international vision, AI-driven operations, and sound systems.

This is not just the company's goal—it's an opportunity for each of us.

Let's create Jarvis's future together.

Jarvis Team | 2026

2026 Strategic Planning

Vision

"Become a small but mighty R&D company in Vietnam, aligned with world-leading technical capabilities, pioneering AGI applications"

Mission

As an AI-driven lean team, provide high-quality software R&D services to the group, develop revenue-generating products, and achieve break-even by 2027 Q2.

Core Strategies

Strategy 1: AI-First Development Model

Goal: AI as core productivity, humans as AI collaborators

Action Plans:

- 1. Fully implement AI development tools (Vibe Coding, Cursor, Copilot)
- 2. Establish AI-assisted workflows
- 3. Cultivate team AI application capabilities

Expected Outcome: Significant increase in per-capita output, achieve more with less

Strategy 2: Product Monetization

Goal: Transform from cost center to profit center

Action Plans:

- 1. Optimize anti-hijacking product, develop new features
- 2. Negotiate commission model with Siraya
- 3. Target 50 customers

Expected Outcome: Establish stable product revenue stream

Strategy 3: Lean Team Building

Goal: 15-person team with complete R&D capabilities

Action Plans:

- 1. Q1 hire Technical Lead (entrepreneurial mindset)
- 2. Expand to 15 people on schedule
- 3. Establish SOP and project management systems

Expected Outcome: Independent and robust R&D company

Strategy 4: International Integration

Goal: Implement cross-border collaboration, integrate group resources

Action Plans:

- 1. Strengthen collaboration with group companies (Siraya, Sky-Net, Tomo)
- 2. Increase personnel exchange frequency
- 3. Participate in cross-border projects

Expected Outcome: Enhanced international vision and capabilities

SWOT Analysis

Strengths	Weaknesses
Local Vietnam company, cost advantage	Small team size
International group resource support	Currently loss-making
Product already launched (Anti-hijacking)	Single revenue source
Leading in AI application	Lack of technical lead

Opportunities	Threats
Vietnam as key foreign investment destination	Talent competition
AGI application market growth	Exchange rate fluctuation
Internal group project demand	Customer dependency on Siraya
Anti-hijacking product market demand	Product competition

Competitive Strategy

Differentiated Positioning

- Small but mighty: AI-enhanced to achieve large team output
- AGI Pioneer: Leading application of latest AI technology
- Group Resources: Backed by international group, not fighting alone

Core Competencies

1. AI-native development capability
2. Local Vietnam + international vision
3. Group product and resource integration

Last Updated: 2026-02-01

2026 Budget Planning

Budget Overview

Item	Amount (VND)	Amount (USD)	Amount (TWD)
Spending Limit	50-60 billion	\$200-250K	6-8 million
Revenue Target	50-60 billion	\$200-250K	6-8 million
vs 2025	~2x growth	—	—

Note: Spending limit is approximately 2x of 2025 total costs, conditional on having a complete development team and product revenue capability.

Funding Sources

Source	Description
Siraya Service Fee	Salary + service fee (existing model)
Anti-hijacking Commission	Per contract terms
Maintenance Fee	Fixed monthly fee
Investment Subsidy	Katsumitec (covers losses)

Revenue Projections

Scenario 1: Service Fee + Maintenance Fee (Conservative)

- Siraya service fee (ongoing)
- Product maintenance fee (fixed monthly)
- Estimated annual revenue: Below spending limit

Scenario 2: Service Fee + Commission Model (50 Customers)

- Siraya service fee (ongoing)
- Anti-hijacking product commission (per contract terms)
- Estimated annual revenue: Near or above spending limit

Note: Commission model has higher revenue potential and is key to achieving break-even.

Expense Structure

Cost Distribution (15-person team)

Category	Percentage
Personnel Costs	~85%
Operating Costs	~15%

Personnel costs include: Salaries, insurance, bonuses

Operating costs include: Office, equipment, other expenses

Profit/Loss Projections

Scenario	Expected Result
Scenario 1 (Conservative)	Loss, requires investment subsidy
Scenario 2 (Commission)	Near break-even or slight profit

Conclusion: To achieve break-even by 2027 Q2, we need to push the commission model and achieve customer targets.

Budget Control Mechanisms

1. Monthly financial report review
2. Quarterly budget allocation adjustments
3. Link hiring progress to revenue
4. Early warning for overspending

Jarvis 2026 Execution Timeline

Annual Overview

2026 Annual Milestones
Q1 (Jan-Mar) Q2 (Apr-Jun) Q3 (Jul-Sep) Q4 (Oct-Dec)
▪ Tech Lead hired ▪ Auto testing ▪ AI HR sales ▪ 15-person
▪ Dev process ▪ AI HR kickoff ▪ Sky-Net GC ▪ Year-end
▪ Vibe Coding ▪ Team: 13 ▪ Team R&D party
▪ 1st exchange ▪ Commission talk ▪ 2nd exchange ▪ 2027 plan

Q1: Building Foundation (Jan-Mar)

Core Tasks: Establish systems, recruit key talent, launch AI capability training
--

Milestones

Item	Target	Description
☐ Technical Lead	Hired	Top priority
☐ Team Size	8 → 11	+3 (including Tech Lead)
☐ Dev Process	Established	Git Flow, CI/CD, Code Review
☐ PM System	Implemented	Sprint, time tracking, Issue Tracking
☐ Vibe Coding	Training started	AI tools, Prompt Engineering
☐ Exchange	1st	End of Q1

Monthly Plan

January

- ◦ Start Technical Lead recruitment
- ◦ Post positions, screen resumes
- ◦ Plan standardized development process

February

- ○ Technical Lead interviews
- ○ Developer recruitment
- ○ Vibe Coding tool selection (Cursor / Copilot)

March

- ○ ☐ Technical Lead on board
- ○ ☐ Team reaches 11
- ○ ☐ Dev process & PM system live
- ○ ☐ Vibe Coding training started
- ○ ☐ First cross-border exchange

Q2: Capability Enhancement (Apr-Jun)

Core Tasks: Deepen AI capabilities, implement testing, start TOMO collaboration

Milestones

Item	Target	Description
☐ Team Size	11 → 13	+2
☐ Auto Testing	Implemented	Quality control
☐ Vibe Coding	Deepened	All members have basic capability
☐ TOMO AI HR	Project started	Localization development
☐ Commission Talk	Completed	Confirm model with Siraya

Monthly Plan

April

- ○ Developer recruitment
- ○ Vibe Coding training continues
- ○ Auto testing implementation planning
- ○ TOMO AI HR project preparation

May

- ○ Auto testing implementation
- ○ Commission model negotiation with Siraya

- ◯ ☐ TOMO AI HR project officially starts
- Customization development
- Localization adjustments
- Technical integration

June

- ◯ ☐ Team reaches 13
- ◯ ☐ Auto testing implementation complete
- ◯ AI HR development in progress

Q3: Product Explosion (Jul-Sep)

Core Tasks: AI HR external sales, Sky-Net GC integration, team R&D kickoff

Milestones

Item	Target	Description
☐ Team Size	13 → 14	+1
☐ TOMO AI HR	External sales	Start generating revenue
☐ Sky-Net GC	Project started	Third-party game integration (100+ games)
☐ Team R&D	Project started	Vietnam market product (team decides)
☐ ☐ Anti-Hijacking	New features live	Continuous optimization
☐ Exchange	2nd	Project collaboration exchange

Monthly Plan

July

- ◯ Anti-hijacking new feature development
- ◯ Hire 1 person
- ◯ ☐ TOMO AI HR external sales starts
- ◯ ☐ Sky-Net GC project starts
- Third-party game integration
- Target: 100+ games

- Estimated revenue: \$50,000+ USD
- ◦ ☐ Team R&D project discussion & kickoff

August

- ◦ Anti-hijacking new feature testing
- ◦ AI HR sales progress
- ◦ GC game integration in progress
- ◦ ☐ Second cross-border exchange

September

- ◦ ☐ Anti-hijacking new features live
- ◦ ☐ Start generating product revenue
- ◦ AI HR & GC projects continue

Q4: Harvest Results (Oct-Dec)

Core Tasks: Achieve annual goals, celebrate, plan 2027

Milestones

Item	Target	Description
☐ Team Size	14 → 15	Achieve annual goal
☐ Customers	Track progress	Target 50
☐ Exchange	3rd	Year-end Celebration Party ☐
☐ 2027 Plan	Completed	Next year planning

Monthly Plan

October

- ◦ Hire 1 person
- ◦ Customer count tracking
- ◦ Project revenue statistics

November

- ◦ Annual review preparation
- ◦ ☐ Third cross-border exchange—Year-end Celebration Party

December

- ◯ ☐ Team reaches 15
- ◯ 2026 Annual Review
- ◯ 2027 Planning
- ◯ Thank every team member for their contribution ♥ ☐

Team Expansion Plan

Quarter	New Hires	Total	Focus
Q1	+3	11	Technical Lead + Developers
Q2	+2	13	Developers
Q3	+1	14	Developers
Q4	+1	15	Developers

Cross-Border Project Timeline

Project	Partner	Start	Milestone	Est. Revenue
TOMO AI HR	TOMO	Q2	Q3 External Sales	\$6,000 USD
Sky-Net GC	Sky-Net	Q3	100+ Game Integration	\$50,000+ USD
Team R&D	Jarvis	Q3	Team Decides	TBD

Cross-Border Exchange Timeline

#	Timeline	Purpose
1st	End of Q1 (March)	Kickoff, build relationships
2nd	Q3 (August)	Project collaboration exchange
3rd	Q4 (November)	Year-end Celebration Party ☐

Key Milestone Tracking

Milestone	Target Time	Status
Technical Lead hired	Q1	☐ Pending
Dev process established	Q1	☐ Pending
PM system established	Q1	☐ Pending
Vibe Coding training complete	Q2	☐ Pending
Auto testing implemented	Q2	☐ Pending
TOMO AI HR sales	Q3	☐ Pending
Sky-Net GC started	Q3	☐ Pending
Team R&D started	Q3	☐ Pending
3 Cross-border exchanges	Q4	☐ Pending
Team: 15 people	Q4	☐ Pending
50 Customers	Q4	☐ Pending
Break-even	2027 Q2	☐ Target

Meeting Schedule

Internal Meetings

Meeting Type	Frequency	Participants	Purpose
Weekly	Every week	All	Progress sync
Monthly Review	Every month	Leads	Goal tracking
Quarterly Review	Every quarter	Ryan + Leads	Strategy adjustment

Management Communication

Frequency	Content	Participants
Monthly	Tech Lead report to Ryan	Tech Lead + Ryan

Frequency	Content	Participants
Year-end	Next year plan presentation	Ryan → All
As needed	Admin coordinates meetings	Admin + Related staff

Cross-Border Exchanges

#	Timeline	Description
1st	End of Q1	Kickoff exchange
2nd	Q3	Project collaboration exchange
3rd	Before Q4 Year-end	Year-end Celebration Party ☐

Jarvis Team | 2026

Jarvis 2026 Q&A

This document provides official answers to questions that team members care about.

Q1: Positioning Difference Between Jarvis and Siraya

Question:

Jarvis is positioned as Siraya's Tech hub, but Siraya is also building its own Tech team. If Siraya has its own Tech team, what is Jarvis's role?

Answer:

Jarvis has always been an independent Vietnamese R&D company, with the advantage of group resource sharing and direct alignment with international markets.

	Jarvis	Siraya
Position	Independent R&D Company	Business/Sales Agency
Core	Pure IT R&D	Focus on Market Expansion
Served To	Multiple Group Companies	Siraya Tech team serves Siraya only
International Alignment	Yes	Internal R&D Center only

Collaboration Background:

Jarvis and Siraya belong to the same group. Initially, both lacked resources, so they complemented each other. Siraya is planning its own Tech team in 2026, but this team will be an internal R&D center under Siraya, not handling any R&D needs outside of Siraya.

Future Model:

When Siraya has its own team, existing Jarvis-Siraya collaborative projects will transition to an outsourced maintenance model, or be transferred to Siraya's R&D team at some point in the future.

Q2: Jarvis Future Plans

Question:

What are Jarvis's future plans? Including scope of work, timeline, direction, and team size.

Answer:

Team Size

8 people → 15 people (by end of 2026)

Quarter	New Hires	Total
Q1	+3 (including Tech Lead)	11
Q2	+2	13
Q3	+1	14
Q4	+1	15

Scope of Work

Existing Projects (Ongoing until Year-End):

- Customer Portal System
- Anti-Hijacking Product

New Projects:

- TOMO AI HR (Q2 Start)
- Sky-Net GC (Q3 Start)
- Team R&D Product (Q3 Start)

Financial Goals

- Annual Revenue: 50-60 billion VND (\$200-250K USD)
- Break-even: 2027 Q2

Direction

Become a small but mighty R&D company in Vietnam, aligned with world-leading technical capabilities, pioneering AGI applications

Q3: Organization Structure and Reporting

Question:

Who does the Tech Lead report to? What is the relationship with Luan?

Answer:

Tech Lead reports directly to Ryan, but is accountable to "clients". In the future, Siraya will also become an independent client.

Luan's Role: Requirements window, technical lead on the client side

Organization Structure

Q4: Information Flow and Communication

Question:

Team members expect to receive company strategy and direction directly from Jarvis management, not through indirect channels. How to improve?

Answer:

This presentation is meant to clearly define the direction for 2026.

The past ambiguity existed because Siraya needed R&D resources and was uncertain about the investment. This year, both shareholders have finalized future development goals, and moving forward we will develop according to the plan documents.

Future Communication Mechanisms

Frequency	Content
Monthly	Tech Lead meeting with Ryan
Year-end	Ryan presents next year's plan
3 times/year	Cross-border exchange meetings (End of Q1, Q3, Q4)
As needed	Admin coordinates meetings for consensus

Q5: Talent Mobility Policy

Question:

If a Jarvis employee wants to transfer to Siraya, what is the company's stance and handling approach?

Answer:

Every employee can make their own choice. For Ryan, both Jarvis and Siraya are his companies, and there is no competition between them.

The better question is: Which company do you want to be in? What goals do you want to achieve?

Important Note

These two companies are not a talent mobility channel offering choices to employees.

If a Jarvis employee wants to transfer to Siraya, it's like:

- Resign from Jarvis → Get hired by Siraya

The reverse is also true. This is a labor market mechanism, not an internal transfer.

Process

1. Notify one month in advance
2. Clear handover plan, complete handover

Important Reminder

- Both companies have different cultures and evaluation methods
 - You are responsible for the results
-

Q6: Career Development

Question:

What is the career development path for Jarvis employees? What growth opportunities are there?

Answer:

Technical Growth

- Vibe Coding training (Cursor / Copilot)
- Prompt Engineering fundamentals
- AI Code Review process
- Standardized development process (Git Flow, CI/CD)

- Automated testing implementation

International Opportunities

- 3 cross-border in-person exchanges (End of Q1, Q3, Q4)
- Cross-border project collaboration (TOMO AI HR, Sky-Net GC)
- Cross-border communication training (AI translation tools + language training)

Self-Directed Development

- Q3 Team R&D project (decided by team, built for Vietnam market)

Team Growth Space

- Team 8 → 15 people, more collaboration and leadership opportunities

Q7: Work Environment and Management Style Differences

Question:

What are the differences between Jarvis and Siraya in terms of work environment, management style, and work mode?

Answer:

Jarvis is a startup, Siraya is a company that has been around for nearly five years. Their systems and management models are completely different.

Siraya is a business company, completely business and market-oriented, with no R&D resources to share, but has excellent market resources that can be combined with products.

Aspect	Jarvis	Siraya
Company Stage	Startup	Mature (~5 years)
Orientation	Technology/R&D Driven	Business/Market Driven
Management Style	Flexible, Flat	Institutionalized, Process-oriented
Resource Advantage	R&D Capability	Market Resources

Last Updated: 2026-02-03
