

Company Strategy & Direction — Induction Briefing

Audience: Tran Hoai Nam (Tech Lead) **Presenter:** Ryan **Date:** 2026-03-16 (Monday) 13:15 - 14:45 (90 min) **Type:** Induction Day 1 — Company Strategy & Direction

1. Company Overview (10 min)

Who is Jarvis?

Jarvis is an **independent R&D company based in Vietnam**, part of an international group, positioned as the group's R&D center.

Item	Description
Positioning	The group's Vietnam R&D company, purely focused on IT R&D
Clients	Multiple companies within the group (Siraya, Tianwang, TOMO, etc.)
Core Strengths	Vietnam local presence + International group resources + AI-native capabilities

Current Team Status

Item	Data
Current Headcount	8 people → 9 after Nam joins
Company Stage	Startup phase, flexible flat management
Orientation	Technology/R&D-driven (vs. Siraya's business/market-driven approach)

Jarvis vs Siraya

	Jarvis	Siraya
Positioning	Independent R&D company	Business/Sales agency
Core Focus	Purely IT R&D	Market expansion
Clients	Multiple group companies	Siraya's own business
Management Style	Flexible, flat	Structured, process-oriented

2. Mission & Vision (10 min)

Vision

*"To become a Vietnam-based R&D company that is **small in size yet mighty in capability**, aligned with world-leading technical expertise, and a **pioneer in AGI applications**."*

Mission

As an AI-driven lean team, deliver high-quality software R&D services to the group while developing revenue-generating products, achieving **break-even by Q2 2027**.

Eight Core Values

Technology-Driven

Principle	Description
AI Governance	Replace traditional human-dependent management with AI to improve decision-making efficiency
Lean Team	Minimal headcount, maximized capability
AI-Native Talent	Cultivate next-generation talent capable of collaborating with AI
Fully AI-Driven	Integrate AI into every aspect, from development to management

People-First

Value	Description
Transparent Communication	Direct and candid communication, transparent information sharing
Mutual Support	Support each other, collaborate as a team
Shared Success	Fair sharing of outcomes, co-creating value
One Family	We are not just colleagues — we are family

3. 2026 Plan (25 min)

Strategic Transformation Focus

2026 is a **transformative year** for Jarvis. We are undergoing a critical strategic shift:

From project maintenance to a product-driven R&D company.

Background

Siraya is building its own development team in Ho Chi Minh City. The existing projects that Jarvis currently maintains for Siraya (client back-office systems, Anti-Hijacking Product) are scheduled to be **fully handed over to Siraya's Ho Chi Minh development company by the end of August**.

What Does This Mean for Jarvis?

Aspect	Transformation
Business Focus	From maintaining existing projects → Independent product R&D

Team Positioning	From execution role → Technology leadership role
Growth Potential	From single client → Diversified product lines
Technical Direction	From maintenance mode → Innovation mode

This is a positive transformation — Jarvis will have greater autonomy, focusing on higher-value product development.

Four Core Strategies

Strategy 1: AI-First Development Model

- AI as the core productivity driver; humans as AI collaborators
- Full adoption of AI development tools (Vibe Coding, Cursor, Copilot)
- Establish AI-assisted workflows
- **Expected Outcome:** Significantly increased per-capita output — achieving more with less

Strategy 2: Product Monetization

- Transform from a cost center to a profit center
- Develop proprietary product lines and establish stable revenue streams
- **Expected Outcome:** Build sustainable product revenue sources

Strategy 3: Lean Team Building

- The goal is not to grow headcount, but to **build a team with comprehensive R&D capabilities**
- Every new member must be someone who can harness AI — a next-generation thinker
- Establish SOPs and project management systems
- **Expected Outcome:** A compact yet fully capable independent R&D company

Strategy 4: International Integration

- Strengthen collaboration with group companies (Siraya, Tianwang, TOMO)
- Cross-border project collaboration with an international perspective

Organizational Goal: Capability-Driven Team Expansion

***Our expansion philosophy: we don't chase headcount — we chase capability density.** In the AI-First era, a single engineer who can harness AI can produce several times the output of the traditional model. We are looking for next-generation thinkers — people who think with AI, collaborate with AI, and create with AI.*

Phase	Focus	Capability Target
Q1 (Current)	Tech Lead onboard (Nam)	Technical leadership, system-building capability
Q2	Recruit based on project needs	Engineers who can independently drive AI-powered development
Q3	Recruit based on project needs	Full-stack talent with product thinking

Q4	Adjust based on actual needs	Complete team R&D capability coverage
----	------------------------------	---------------------------------------

Recruitment Standards:

- Possess AI-native thinking, capable of integrating AI into daily development
- Not just able to write code, but able to amplify output with AI
- Aligned with the lean team culture — pursuing maximized capability, not maximized headcount

Financial Targets

Item	Target
Annual Revenue Target	50-60 billion VND (approx. \$200-250K USD)
Break-even	Q2 2027
Cost Structure	Personnel costs ~85%, Operating costs ~15%

Technical Targets

Item	Current Status	Target	Timeline
Git Flow	GitLab foundation in place	Establish comprehensive standards	Led by Nam
CI/CD	To be established	Automated deployment	Q2
AI Code Review	To be established	Integrate into workflow	Q2
Automated Testing	To be introduced	Achieve coverage targets	Q2
Vibe Coding	Partially adopted by team	Full team proficiency	Ongoing
Documentation Standards	To be established	API Docs, README	Q2

International Targets

- Launch **3 new projects** with **3 different group companies**
- At least **3** cross-border in-person exchanges (end of Q1, Q3, Q4)
- Cross-border communication training (AI translation tools + language skills)

4. 3 New Projects (20 min)

Project Overview

#	Project	Partner	Launch	Estimated Revenue
---	---------	---------	--------	-------------------

1	TOMO AI HR	TOMO	Q2	\$6,000+ USD
2	Tianwang GC	Tianwang	Q3	\$50,000+ USD
3	In-house R&D	Jarvis (self-initiated)	Q3	TBD

#1 TOMO AI HR (Launching Q2)

Item	Description
Scope	AI HR system localization development + resale agency
Collaboration Model	Customized development + Technical integration
Timeline	Q2 localization rollout → Q3 external sales
Significance	Jarvis's first product-oriented collaboration project

#2 Tianwang GC (Launching Q3)

Item	Description
Scope	Third-party game integration platform
Scale	Integration with 100+ games
Estimated Revenue	\$50,000+ USD
Significance	High-revenue-potential technical integration project

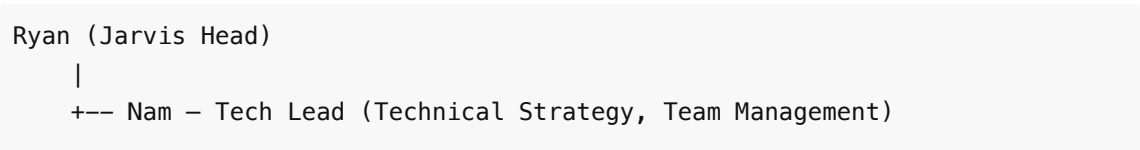

#3 In-house R&D (Launching Q3)

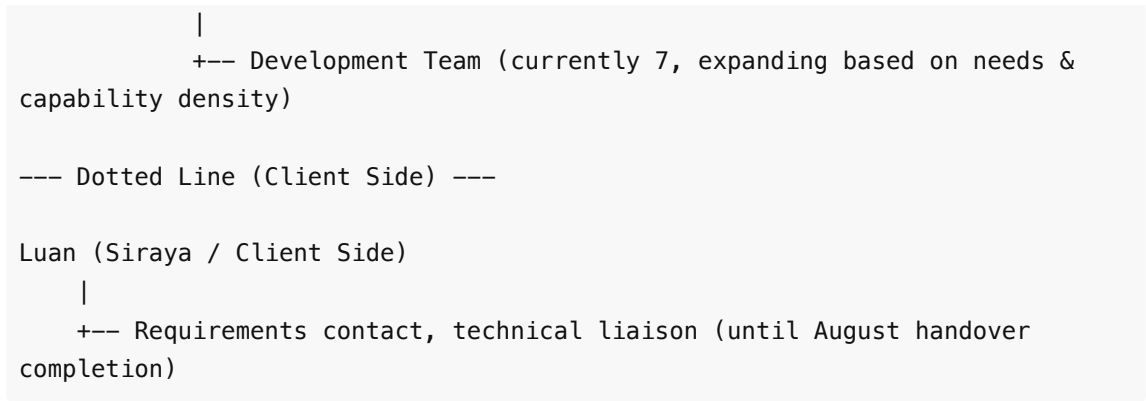

Item	Description
Scope	Self-developed product for the Vietnam market
Decision Process	Decided collectively by the team
Significance	Jarvis's own flagship product

"Once we have full development capabilities, I hope Jarvis can have its own flagship product — one built for the Vietnam market, unanimously supported by the team, and worthy of our full commitment."

5. Nam's Role & Expectations (15 min)

Organizational Structure

- **Reports directly to Ryan**
- Monthly fixed Tech Lead + Ryan reporting meetings
- Accountable to "clients" (various group companies)

Two Parallel Key Responsibilities

Responsibility 1: Building Development Systems

Nam's top priority upon joining is to establish comprehensive development practices:

System	Description	Priority
Development Workflow Standards	Git Flow, Branch Strategy, Code Review SOP	Highest
CI/CD Pipeline	Automated build, test, and deployment	High
AI Code Review	Integrate AI-assisted Code Review into workflow	High
Project Management	Sprint Planning, Retrospective, Issue Tracking	High
Automated Testing	Testing framework, coverage standards	Medium
Documentation Standards	API Docs, README, technical documentation	Medium

Responsibility 2: Driving New Projects

Project	Role	Timeline
Siraya Project Handover	Lead the handover process, ensure quality	Mar-Aug
TOMO AI HR	Technical lead, guide development	From Q2
Tianwang GC	Architecture design, technical oversight	From Q3
In-house R&D	Facilitate team discussion on direction	From Q3

What We Expect from Our Tech Lead

We don't need a traditional manager — we need a leader with an **entrepreneurial mindset**:

Expectation	Description
Hands-on Expertise	Deep technical foundation, capable of personally solving problems
Leadership & Integration	Outstanding leadership, integrating cross-departmental resources
Forward Thinking	Insight into future trends, leading the team to breakthroughs
System Builder	Build development systems from scratch, elevating team effectiveness
AI-Driven	Embrace AI tools and champion the AI-First development model

6. KPI Discussion (10 min)

2026 KPI Overview

The following KPIs were set at the beginning of the year and need to be reviewed and adjusted together with Nam.

#	Metric	Target	Timeline	Status
1	Annual Revenue	50-60 billion VND	Full Year	—
2	Complete Team R&D Capabilities	Full product R&D capability	Q4	In Progress (currently 9 people)
3	Tech Lead Onboarded	1 person	Q1	Achieved (Nam)
4	Anti-Hijacking Product Clients	50 clients	Q4	Needs review
5	Standardized Development Workflow	Completed	Q1→Q2	Led by Nam
6	Project Management System	Completed	Q1→Q2	Led by Nam
7	Vibe Coding Training	Completed	Q2	In Progress
8	Automated Testing Implementation	Completed	Q2	Led by Nam
9	Cross-border New Projects	3 projects	Q3	In Planning
10	Cross-border Exchanges	3 times	Q4	1st to be scheduled

Open Discussion

- Which KPIs need adjusted targets or timelines?
- Are there KPIs that should be added or removed?
- Which items does Nam believe should be prioritized?
- How should we measure the Tech Lead's individual KPIs?

These KPIs are not final — we will revise them together based on today's discussion.

Appendix: Key Timeline

Mar	Nam onboards, familiarizes with existing projects and team
Apr	Begin establishing development systems (Git Flow, CI/CD, Code Review)
May	TOMO AI HR project launches
Jun-Aug	Siraya existing project handover
Jul	Tianwang GC project launches
Aug	In-house R&D project discussion
Q4	Harvest results, plan for 2027

Q&A

Feel free to ask any questions about company strategy, direction, or expectations.
