

Vietnam's First Outcome-Based Hiring Engine

Hire Chinese-speaking talent with verified language ability, industry-fit screening, and outcome-based payment.

SECTION 1

Product Introduction

Hire faster with greater confidence

Current situation

Recruiting Chinese-speaking candidates primarily via Facebook groups or freelance networks, leading to low-quality and unverified profiles.

HR Challenges

Wasted time manually filtering junk CVs; no standardized tool to assess actual language proficiency.

Business Risks

Candidates quit within the first month, causing wasted time and costs for the business.

Assessment Barriers

Lack of tools to verify language proficiency and specific professional skills during the profile screening step.

High Turnover Rate

Bilingual personnel are aggressively headhunted, leading to high job-hopping rates within the first 6-12 months.

Current common recruitment methods

-  **Pay before results**
Costs incurred upfront, regardless of candidate quality
-  **CVs without language verification**
HR must manually verify Chinese proficiency through every interview
-  **No guarantee mechanism**
Candidates quitting in the first month leaves the business with all the risks

Jarvis Hire's solution

-  **Pay only after 30 days of employment**
No hired candidates, no invoice
-  **In-depth Chinese verification**
Evaluated before reaching HR, based on specific position requirements
-  **30-day practical assessment**
Jarvis's interest are directly tied to the business's recruitment results

Jarvis is not just sourcing, it is pre-qualification + verified shortlist

01

Qualified candidate pool

Receive a list of candidates analyzed and evaluated by the system instead of irrelevant CVs

02

Centralized & Transparent management

Track the entire process (Application => Interview => Onboarding) on a single interface

03

Time optimization

Candidates apply quickly on the platform, ensuring the business does not miss out on talent

04

Strict assessment process

Ensures quality personnel working effectively and long-term commitments

01

Position-based Chinese Assessment

Not just using HSK as a benchmark, Assessments are customized by industries and job types (Manufacturing, Logistics, Purchasing, Administration, etc.)

Customized for each business

02

Industry-specific Screening

Candidates are filtered by both language proficiency and suitability for the operational environment

Industry-fit screening

03

Pay-for-performance

No upfront fees. Success fee is calculated only after the candidate completes 30 days of work. Risks are shared - not just on the business side

Verified hire model

Key Features

PRODUCT

Chinese Proficiency Test

Candidates take an in-platform HSK test; AI scores it.

HSK OCR auto-verify + Jarvis verified badge

HSK certificate reads and verifies the level automatically.

AI matching and summary

AI scores candidate-job fit and generates a summary report for employers.

Domain screening test

AI generates a custom screening test candidates must pass before applying

Hiring pipeline & candidate pool with AI assist

Manage and search candidates intelligently across the hiring pipeline and talent pool

30-day hire verification

Ops confirm the hire is genuine within 30 days

Application process

PRODUCT

Who is this solution for

PRODUCT

Current problems

- Recruitment via **Facebook/freelance networks** (unverified profiles)
- HR **wastes time for manual filtering**, no verified criteria
- Pay for **upfront** — not aligned with candidates quality
- **No refund mechanism** when candidates quit within 30 days
- Lack of specialized platforms for **Chinese candidates** in VN
