<i>(To be filled by the interviewer)</i>		
Skill	Score (0-10)	
Backend technologies: JavaScript (Node.js), Python, Go, PHP	7	
Frontend technologies: React, Next.js, Vue.js, jQuery, HTML, CSS.	6	
System design, architecture, and integration	8	
Project management skills	7	
Understanding of CDN Services like as: Cloudflare, Cloudfront, Akamai	6	
Comments: - Good fundamental knowledge, understanding not only Software architecture but also System architecture and how it's worked - Strong BE skill more than FE skill, enough to know which solution is better to go - Flexible BE skill and domains: Data processing, high scale system, optimize code and tuning system flow - Good exp for Financial Domain, he was working for Zalo Pay (top 3 E-Wallet in VN) - Familiar with Cloud Services and K8s at adv. level		
C. Soft Skills		
	Score (0-10)	
Communication	8	
Teamwork	8	
Problem-Solving	7	
Adaptability	8	
Leadership Potential	6	
Comments: - Carely and clearly communication, during conversation, he often repeat to confirm if the thing we were talking about not clear - understanding how to split tasks and follow, though some conflict case, he was confused and didn't give me the answer - not much evident about leadership skills he showed. need watching more		
D. Additional Qualifications & Plus Points		
	Yes/No	
Relevant Certifications		
Additional Languages	English: Good	
Higher Education Degree		
Industry Experience		
Special Achievements		
E. Other Comments from HR		
- Has experience leading teams comprising both junior and senior members. Demonstrates strong adaptability to new environments and places a high emphasis on organizational culture and internal communication. - Appears to be a well-organized individual with the ability to coordinate team efforts effectively, particularly in meeting settings. - Has experience working with international clients => capable of partially backing up Lily (PO) during her maternity leave. - Possesses strong English communication skills. - Regarding Vibe Coding: Has explored and applied this approach previously; however, it was not perceived as effective at that time. Nonetheless, the candidate recognizes its potential value and is open to further development if project requirements call for it. - Initially, the candidate expected a salary of VND 62 million. After further discussion and clarification on the minimum acceptable level, he indicated that VND 55 million would be acceptable. => HR proposes a salary of VND 58 million to balance talent retention while remaining within the company's budget constraints.		
Additional Notes:		
Overall comments		
His tech skill is strong enough to make right way decision and understanding SDLC. Although he didn't show much about Leadership skill, however i think i can manage small team well by natural personality		

Current Level:	Senior (Middle Management)			
Salary Proposal:	58 mil
